

Rising 2<sup>nd</sup> Grade Math

#### Dear Parents.

Attached is the 2nd-grade math packet. Please have your child complete each page, and bring the completed packet on the first day of school. This will be your child's first math grade in 2nd grade.

In order to be successful in 2nd-grade math, it is very important for the children to know the basic addition and subtraction facts to I8. We have included practice for this in our packet. However, students love flashcards and games. You can also find videos and other instructional materials to help make it fun. You can quiz and drill them orally just driving along in the car. Make it fun - praise - encourage.

The other practice assignments are concepts that are important to review. Again, we encourage you to make it fun. Complete the math packet a little at a time. The idea is to keep skills and objectives fresh for the beginning of the new school year.
