

Dear Rising Third Grade Parents and Students,

My name is Ashley Brown and I will be your child's math teacher in third grade. It is important for students to review their math and reading skills during the summer so that they retain all that has been taught up to this point. I would like for your child to review skills taught during their second grade year and begin learning their 1's, 2's, 3's, 4's, 5's, & 10's multiplication and division facts. Our new math curriculum will start the multiplication unit at 6's, so it is important for the students to have prior knowledge of the preceding multiplication and division facts. This packet includes all of the review skills and new skills. *Students should complete this packet and bring it with them on the first day of school. It will be recorded as a quiz grade for the first nine weeks.* We also encourage students to continue reading throughout the summer.

This summer math packet covers the following math skills:

- Place value to the thousands (*review skill*)
- Rounding to the nearest ten and hundred (*review skill*)
- Addition Facts & Addition with Regrouping (*review skill*)
- Subtraction Facts & Subtracting with Regrouping (*review skill*)
- Telling time (*review skill*)
- Counting money (*review skill*)
- 1's, 2's, 3's, 4's, 5's, & 10's multiplication facts (*new skill*)
- 1's, 2's, 3's, 4's, 5's, & 10's division facts (*new skill*)

*We will begin with the 6, 7, 8, 9, 11, & 12 multiplication/division fact sets at the beginning of third grade, so it is important for students to learn the previous multiplication fact sets before third grade.

There are several websites with great games to practice and review all of these skills. I am listing a few below that you may want to check out with your child.

Sincerely,

Ashley Brown
