Parents:
Included in this packet you will find your child's summer math workbook. This work is due on the first day of school next year. This math packet will be graded and will count as your child's first quiz grade in 5 th grade math.

This work contains a review of skills that your child learned while in the 4th grade. If your child needs help remembering how to work these problems, Khan Academy is a great online resource. The website for Khan is khanacademy.org/ Once you get to the website, press sign up as a learner or parent. Once you are signed in, you will be able to search for videos related to these math skills. The videos do a great job of breaking down the skills into smaller steps, making it easy for students to follow.
